

As a reminder, please do **NOT** flush wipes, paper towels and/or similar items down the toilet. These items clog the sewer systems and can cause backups and overflows. Even wipes labeled as “flushable” should **NOT** be flushed down the toilet. These items do not break down like toilet paper and you stand a much greater chance of clogging your grinder pump and sewer line.

These problems can be costly to the City and ultimately, to the citizens themselves.

If a repair is needed to your grinder pump resulting from the clogging of the above mentioned items, you could be responsible for the repair.

We appreciate your cooperation!
